In addition to drafting and designing applications, AutoCAD is often used for data entry, including annotation. AutoCAD offers numerous methods of drawing data into the drawing workspace. AutoCAD is used to design products for a variety of industries, including automotive, aerospace, building construction, civil engineering, and manufacturing. It is used to make 2D and 3D drawings. Several third-party tools are available to help AutoCAD users design. AutoLISP, for example, can be used to extend AutoCAD's functionality. Contents AutoCAD came from many years of experience in drawing. It is the first product that has been fully dedicated to design. AutoCAD is a multi-user, multi-platform product. It can run on all major computing platforms, such as Microsoft Windows, macOS, Android, Linux, and IBM System i. As of 2019, Autodesk is working on a Revit extension (Revit LISP) for the AutoCAD 2018 product. History The first AutoCAD desktop app was released in 1982. The original developer was John Housman and Russell Lydall. Housman later co-founded the software company that bears his name, iCAD Software (now I3D Software). Lydall wrote the first version of AutoCAD and was responsible for much of its design. A programming language called AutoLISP was added to the first AutoCAD in 1982. It was one of the first CAD application programming interfaces (APIs). Since AutoLISP was originally designed to access AutoCAD, it has become a de facto standard for CAD program integration. AutoCAD released versions 7 through 10 in 1985, 1988, 1991, 1993, 1995, 1997, 1999, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, and 2019. In April 2016, Autodesk announced that the company will be buying I3D Software, the developer of the Revit LISP software. The company stated that it would offer Revit users a product with "many of the same features and user interfaces as AutoCAD." In addition, the Revit LISP software would be integrated into the Autodesk 360 platform. The first Autodesk Architectural Desktop app was released

That sentiment is echoed by Sara A. Danziger, the director of the Center for Genome Ethics and Policy at Washington University in St. Louis, who told me, "I don't think you can pick out people from their whole generation. We're all better thinkers than we used to be." Still, Danziger cautioned that the public should think twice before going off the reservation. "That's not to say that we've all become more reasonable," she said. "When I look at the public discourse, I see a lot of noise." Some of this noise is intended for effect. For instance, the Republican Party touts itself as the party of family values, but on the campaign trail this year, it has sometimes been difficult to tell who is an actual supporter of traditional family values and who is just speaking a line to help a candidate win.
